

Packaging Instruction

Maximum Weight

The maximum weight per package shall not be more than 15 kilograms. The reason is that also women and elder men work in our incoming inspection area.

Outer Dimensions (e.g. corrugated boxes)

For all internal logistics Uster Technologies applies plastic circulation containers. That means we have to repack everything in our incoming inspection area. To minimize this effort we ask you to use corrugated boxes with the following maximum dimensions:

- Length: 550 mm
- Width: 360 mm
- Height: 245 mm

This enables us to put your boxes directly into our containers and eliminates the repacking process.

Thank you very much for your effort and your understanding.

Example of non-fitting box (just for information)
